

About GES

Firm Overview

Innovation, Quality, Value

Groundwater & Environmental Services, Inc., also known as GES, is a privately-owned small business staffed with talented environmental scientists, engineers, consultants, and hands-on technical specialists. We train and encourage our staff to be innovators, problem solvers, and trusted partners to the organizations that count on us to tackle their most pressing environmental and infrastructure challenges.

For more than 38 years, GES has provided integrated environmental services that drive value for our clients across North America. We work with the world's leading corporations and government agencies to develop cost-effective permitting, compliance, design, construction, and operations solutions that carefully balance your infrastructure objectives with environmental risk and liability.

GES At-A-Glance
